

JEREMY D. PRETTY

GAME PRODUCTION / TECHNICAL LEADERSHIP

Schertz, Texas | 580-481-8501 | jeremypretty@jeremy-pretty.com

EXPLORE THE GAMES gaming.tmfpretty.com

Professional Profile

Game production and technology leader supporting Diablo IV, Overwatch 2, and World of Warcraft releases at Blizzard Entertainment. Led **12 employees and 50 contractors** across graphics, performance, online, engine, and data science quality teams. Combines release planning and AI-driven quality tools with hands-on Unity development and original Game Boy Color projects.

Core Expertise

Game production | Technical project management | Release planning | Cross-functional leadership | Quality engineering | Risk management | Performance and graphics testing | AI-assisted development | Gameplay systems | Unity tooling | Player experience

Game Industry Experience

Project Manager / Senior Test Lead | Blizzard Entertainment

Austin, Texas | 2021-2024

- Directed a global quality organization of **12 employees and 50 contractors** across Graphics, Performance, Online, Game Engine, and Data Science teams.
- Owned test schedules, estimates, planning, execution, reporting, closure, risks, and quality metrics; coordinated with development leadership and regional teams on high-visibility releases.
- Developed a Python/NLTK context-aware bug-triage application that improved triage accuracy and efficiency by **75%** and eliminated approximately **80 weekly staff-hours** of Jira triage meetings.
- Spearheaded a Python, OpenCV, and TensorFlow visual-anomaly detection tool for real-time game monitoring, automated discrepancy detection, and annotated evidence capture.
- Led recruiting, coaching, performance support, and succession planning; created reporting to inform decisions about product quality, usability, and system limitations.

Selected Release Contributions

Diablo IV | Overwatch 2 | World of Warcraft: Dragonflight | World of Warcraft: Wrath of the Lich King Classic

Software Engineer Volunteer | Game Create Repeat

Remote global team | 2021

- Programmed the Fear/Wonder Meter user interface and AI features for Fireflies and Figments: A Willow's Journey, a Unity vertical-slice game planned for Steam release.

Independent Game Development

Founder | TMFPRETTY, LLC

Independent game development and technical direction | 2024-Present

- Directs original games from concept and world design through gameplay implementation, tooling, and testing.
- Architected a Unity RPG codebase spanning **40+** gameplay and networking systems and built **34 custom Unity Editor tools** supporting asset generation through deployment.
- Leads AI/ML work for procedural content, enemy behavior, adaptive difficulty, narrative systems, and test automation.

Selected Original Games

Untitled 2D Isometric RPG | PC | Unity | In development

Fantasy RPG evolving into 3D, with city exploration, roadside combat, and dungeons. Built interconnected gameplay systems, AI/ML pipelines, and Unity Editor tools.

Valerithar The Fallen Crown | Game Boy Color adventure

Original pixel-art adventure with five classes, six cities, quests, crafting, and dungeon encounters.

Crawler Broken Signal | Game Boy Color strategy

Mobile-base strategy with alloy harvesting and force command across a three-mission campaign.

Additional Technical Leadership

Chief Artificial Intelligence Officer | PMAT Inc. | 2024-Present

Established AI strategy and an AI/ML Center of Excellence; leads PM and QA supporting federal programs exceeding **\$500 million** in aggregate value.

Senior Technical Program Manager | US Air Force Civil Service | 2019-2021

Led AWS GovCloud application migration and served as Alternate Contracting Officer's Representative for a **\$38 million** contract; delivered savings exceeding **\$500,000** annually.

Game Development Education

Adjunct Professor and Game Curriculum Contributor | Grand Canyon University

College of Engineering and Technology | 2024-Present

Curriculum expertise in multiplayer development and game creation; peer review for game security, anti-cheat, physics, and simulation.

Technical Skills

Unity | C# | C/C++ | Python | TensorFlow | OpenCV | NLTK | Jira
Agile delivery | Test management | Defect triage | Computer vision | NLP

Education and Certifications

PhD, Product Management | Capitol Technology University
MS, Artificial Intelligence and Machine Learning | Colorado State University Global
MS, Project Management | Embry-Riddle Aeronautical University
MBA | East Texas A&M University
PMP | PMI-ACP | PMI-SP | ISTQB CTAL-TM | ISTQB CTFL
